SUMMARY

Frontend Lead with 5+ years of experience in MERN/MEAN stack, building scalable web applications, dashboards, and financial systems. Expert in React, Angular, Node.js with strong skills in performance optimization, API integration, and team leadership.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, SQL – Strong foundation in full-stack and data-driven development.

Frontend/Backend: React, Angular– Experienced in scalable responsive UI designs , cross-browser compatibility and API driven systems.

Backend & APIs: Node.js, Express.js, REST APIs, JWT Authentication

Architecture: Optimized Architecture, Performance Optimization, Real-time Systems

Tools & Data: Redux, NgRx, ECharts– Skilled in state management, visualization.

Cloud & DevOps: AWS, Azure

Testing & Workflow: Unit Testing, Integration Testing, Agile, Jira, Git, Postman

EXPERIENCE

Frontend Lead

Mar 2024 – Present

Greenpay Network Pvt. Ltd. –

- Led development of real-time financial dashboards handling 10K+ transactions/day, improving data visibility by 30% and enabling efficient monitoring.
- Built scalable UI architecture, reduced load time by 25%, and mentored 4+ developers while implementing JWT authentication and CI/CD pipelines.

Software Developer

Aug 2023 – Mar 2024

Thinkonic Software Pvt. Ltd.-

- Developed data-driven dashboards processing large datasets, improving analytics performance by 20% using modern frontend technologies.
- Enhanced system scalability by 20% through optimized architecture, REST API integration, and caching strategies.

Assistant Software Engineer

June 2021 – Aug 2023

Konverge AI –

- Built live data dashboards, high-performance frontend modules and visualization tools, improving monitoring efficiency by 30% for analytics systems.
- Developed high-performance UI frontend modules and APIs, improving application responsiveness by 25% and user experience.

PROJECTS

FinPay App – Developed secure B2B financial application with JWT authentication and encrypted transaction workflows.

MLStream Visualizer – Created monitoring dashboard with real-time APIs for tracking machine learning performance.

UrbanData Map – Developed traffic analytics dashboard delivering actionable insights through data visualization.

ACHIEVEMENTS

- Delivered multiple scalable dashboards and real-time analytics systems across domains. - proven experience in frontend architecture, APIs, and production-level deployments.

CERTIFICATIONS

(Udemy)- Mern Stack Front to Back , Advance React Redux, Javascript Basics for Beginners, Python 3 Programming

(Hackerrank)- Problem Solving Basics

EDUCATION

Fergusson College

M.Sc. (Computer Application)

Aug 2019 – June 2021
